SUMMARY

Backend-focused Software Developer with strong experience building scalable Java microservices, cloud-native applications, and enterprise platforms. Skilled in distributed systems, API engineering, cost-optimization services, and GenAI platform development. Known for writing maintainable, test-driven code and collaborating effectively across engineering, DevOps, and product teams.

TECHNICAL SKILLS

Languages: Java, SQL

Frameworks: Spring Boot, Spring Security, Spring Cloud, Hibernate, JPA, MCP, LangGraph

Microservices & Messaging: Kafka, Redis, REST APIs

DevOps / CI-CD: Maven, Jenkins, GitLab CI, SonarQube

Cloud / Containers: AWS (EC2, S3), Kubernetes, Docker, Firebase

Databases: MySQL, PostgreSQL, Firebase Realtime DB

Tools: Git, Postman, IntelliJ IDEA

EXPERIENCE

Java Backend Developer

Apr 2025 – Present

Tata Consultancy Services (Client: Nutanix)

Hyderabad, India

- **Project: NCM Cost Governance** – Multicloud cost-visibility platform offering real-time insights across AWS, Azure, GCP, and on-prem environments. Supports budget governance, spend forecasting, and automated idle-resource analysis.
- Designed and enhanced REST APIs for cloud cost insights, budget tracking, and resource optimization workflows.
- Improved reliability and performance by refactoring legacy services and migrating Java 8 codebases to Java 21.
- Developed robust JUnit/Mockito test suites achieving 85%+ test coverage across high-impact services.
- Collaborated with architects and senior engineers to enforce API standards, coding best practices, and secure design patterns.

Platform Engineering – GenAI & Java Developer (NextGen Labs)

Jul 2022 – Mar 2025

Tata Consultancy Services

Hyderabad, India

- **Project: Platform Engineering** – Self-service portal enabling automated provisioning of VMs, storage, and MDDP services with team-level chargeback and observability.
- Built microservices supporting caching (Redis), logging pipelines (EFK), and event-driven workflows (Kafka/RabbitMQ).
- Engineered APIs to provision AWS EC2 virtual machines dynamically based on user-selected configurations.
- Implemented secure service-to-service communication using Spring Security, OAuth2, and Keycloak.
- Optimized platform performance, reducing provisioning latency and improving resource utilization.
- **GenAI Platform Work**
- Developed *GenAI-as-a-Service* enabling teams to deploy and scale LLMs on Kubernetes clusters.
- Created reusable platform components for messaging, caching, authentication, and observability.

EDUCATION

SASTRA University

2018 – 2022

B.Tech in Computer Science and Engineering (CGPA: 8.57)

Thanjavur, India

ACHIEVEMENTS

- Developed “BeingVaidya” Android app with 20,000+ installs and 4.7 rating on Google Play Store.
